EDUCATION

University of Waterloo

Bachelor of Applied Science in Computer Engineering

- President's Scholarship

Waterloo, ON

Sept 2023 – Present

St. Augustine Catholic High School

Ontario Secondary School Diploma

- Highest Achievement Award for Grade 12 Computer Science (ICS4U)
- Highest Achievement Award for Grade 12 Computer Engineering (TEJ4M)
- Chem 13 News Exam Certificate of Distinction

Markham, ON

Sept 2019 – June 2023

EXPERIENCE

Design Leader

FTC Team 19946 - Team Titans Robotics

- Developed 3D robotic components using OnShape to support mechanical subsystems for the team robot
- Worked in a mechanical subteam of 5+ people to coordinate the robot's design in under 2 months
- Planned CAD workshops and taught OnShape fundamentals to over 100+ students

June 2021 – June 2023

Markham, ON

Website Manager

Crafting for a Cure

- Updated website using Webflow by implementing changes requested by the charity founder
- Worked in a team with the company Infinidiv to discuss changes made to the website
- Used Canva to update graphics with new information about the requested changes

Sept 2021 – Aug 2023

Thornhill, ON

Computer Science Club Co-President

St. Augustine Catholic High School

- Taught computer science principles to over 70 students to prepare them for the Canadian Computing Competition
- Coordinated a cross-school programming competition with 5+ schools in Toronto and York Region
- Worked in a team of 9 other executives to plan and teach beginner to advanced programming workshops

Oct 2022 – June 2023

Markham, ON

PROJECTS

Autonomous Car | Python, Raspberry Pi, HTML

- Developed a controllable and autonomous car using a Raspberry Pi micro-controller programmed with Python
- Designed a webpage using HTML that controlled the motion of the car
- Used photoresistors and ultrasonic sensors to estimate the odometry of the car
- Designed the shell of the car to withstand external forces using composite materials

Dec 2022 – Jan 2023

AnimeList App | Java, JavaFX

- Designed and developed a JavaFX application that processes Anime data from a CSV file to display to users
- Implemented sorting algorithms to change the view of the Anime data in a displayed list
- Designed a UI/UX application that considers user interaction and experience
- Designed an algorithm that processes user-inputted data to control a bar and circle chart

June 2023 – Aug 2023

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML, CSS

Developer Tools: Git, Github, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Technical: Arduino, Raspberry Pi, Tinkercad, STM32
